

WINvsw

The new „**vertikal-sliding-window**“ made in germany

Easy to handle

WINvsw, the innovative vertical-sliding window in high german quality, is produced implementing a new invented lifting technology. The system is internationally patented. WINvsw is easy to lift (even as you sit) and fits the same high standard as a normal side-hung window.

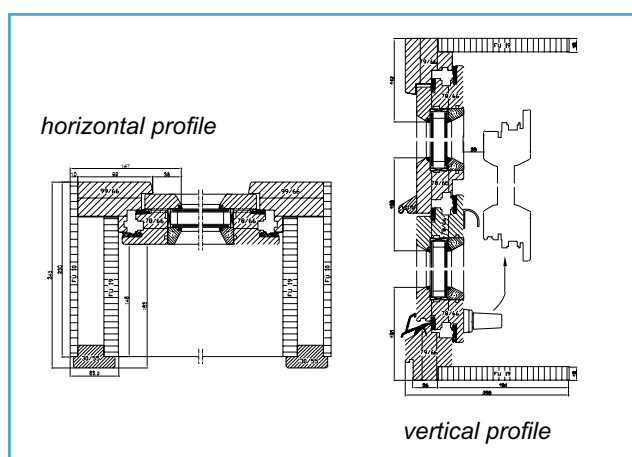

Special feature: upper and lower sash are arranged in one level.

Your advantage: Extreme tightness as well as excellent user-friendliness

Safety

The development of the new lifting method allows the sliding-sash to stop steplessly in every position when opening: no more sticking, jamming or slipping. A big plus for aging or disabled people as well as for children.

Your advantage: High degree of security

Quality

WINvsw windows are known for their outstanding quality. Characteristic for WINvsw, as for all handcrafted windows made in germany, is its excellent construction, its solidity and durability. Therefore WINvsw is protected by a three-level finishing. To ensure lasting high performance of the windows, adjustable multipoint fittings are installed. Besides normal weatherproofing, a second sealing guarantees a leakproof window.

Your advantage: Lasting endurance and extraordinary sound and heat insulation

WINvsw is available in various combinations:

If in traditional appearance, divided by sprouts, in timber or in timber-metal: your requirements decide on which type of WINvsw you get. You can choose from a wide range of different colours, wood, safety options such as special hardware with integrated magnetic alarm systems, or safty-glasing in various levels.

Furthermore it's no problem to upgrade WINvsw in existing rooms. It is suitable for private use as well as for commercial use, e.g. in pubs or restaurants.

Your advantage: Wide range of application
